

Your Facility Cleanliness Self-Assessment Checklist

Is your cleaning protocol costing you time, money, and results? This quick self-assessment will help you quickly identify inefficiencies and problem areas in your fleet and facility cleaning operations.

Fleet & Equipment

YES NO

Are your vehicles and equipment consistently free of tough dirt, grease, or grime buildup?

Do your cleaning protocols protect against rust and corrosion on your vehicles and machinery?

Does your fleet's appearance reflect a professional image that strengthens your brand?

Process/Operation Efficiency

YES NO

Do your team members receive regular training on proper cleaning techniques and equipment use?

Do you have a clear, documented process for cleaning, sanitizing, and degreasing your fleet and facilities?

Are your cleaning products cost-effective, minimizing waste while delivering results?

Can your current products tackle tough jobs like tar, asphalt, or heavy grease?

Process/Operation Efficiency

YES NO

Are you satisfied that your current degreasers, vehicle washes, or specialty cleaners deliver the results you expect?

Is your cleaning equipment, such as pressure washers or parts washers, reliable and free from frequent breakdowns or excessive maintenance?

Are your employees always sure which product to use for a specific job?

Do you have a single, trusted vendor for your fleet and facility cleaning product needs?

Whatever your results, we'd love to offer you an invitation for a free on-site consultation with our experts. Get in touch with us—we're excited to show you how our custom solutions can make a real difference for your facility.
